

6516209870.txt

I am totally opposed to the idea of silencing of satellite radio's local broadcasting channels such as traffic and weather. As long as the information is up-to-date and accurate, what exact harm is it doing? I suspect such an attack would be attacking freedom of speech in some way.  
Please leave satellite radio alone. If local stations have a problem, maybe they should take a look at themselves and better their own broadcasts.
